AKILA
GLOBAL GO-TO-MARKET CASE STUDY

Building a commercial narrative, demand engine, and scalable marketing system around a complex smart building SaaS platform.

BUSINESS

Smart Building SaaS

SCOPE

Branding, product marketing, demand generation, partner marketing, ABM,

MARKETS

Global

OUTCOME

Scaled from pre-seed to $11M ARR

CHALLENGE AND OBJECTIVE

Akila had strong technology but needed a clearer market story and scalable commercial system.

CONTEXT

Akila had a technically strong product in digital twin technology for buildings, but it needed a clearer market narrative, a repeatable demand engine, and updated branding to stay competitive in a heated market.

CHALLENGES

- Complex technology and product with an in-progress business model
- Scattered marketing efforts lacking a defined strategic focus
- Unimpressive branding in a highly competitive market

OBJECTIVES

- Translate technical product and services into clear value propositions
- Systematize marketing efforts and link them with sales outcomes
- Change a lackluster visual identity into something more market ready

Goal: move from reactive activity to a commercialized global go-to-market motion.

MESSAGING & PRODUCT MARKETING FOUNDATION

- Reframing the product around business outcomes made the platform easier to understand, sell, and launch.

WHAT CHANGED

Reframed the product around business outcomes such as building performance, energy efficiency, emissions reduction, and operational visibility rather than technical features alone. Created videos, one-pagers, technical materials, sales collateral, and launch assets that helped both commercial teams and customers understand the platform quickly.

OUTCOME A stronger commercial narrative that made complex technology easier to communicate across customers, partners, and internal teams.

KEY DELIVERABLES

- Brand strategy and messaging architecture
- Persona and vertical-specific positioning
- Website pages and conversion pathways
- Product videos and explainer content
- One-pagers, technical sheets, and decks
- Thought leadership articles and white papers

DEMAND GENERATION & MARKET EXPANSION

- The work combined awareness, pipeline creation, partner leverage, and cross-functional alignment.

DEMAND GENERATION ENGINE
Built awareness and pipeline through gated premium content, webinars, search and social campaigns, partner marketing, and targeted account-based programs.

CROSS-FUNCTIONAL ALIGNMENT
Worked closely with sales, product, and leadership from day one to align campaigns with commercial priorities and customer feedback.

REGIONAL AND PARTNER EXPANSION
Adapted execution across markets while supporting strategic relationships with partners, including Deloitte and NVIDIA Omniverse.

DELIVERABLES

- Paid search and paid social campaigns
- Webinars and partner co-marketing programs
- Sales enablement content for enterprise conversations

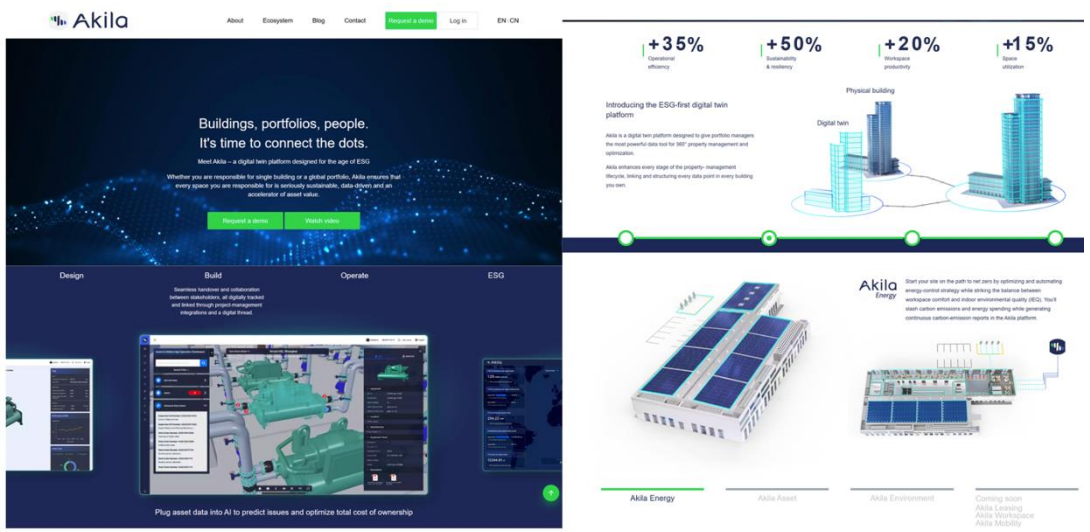
OUTCOME

3-4x increase in qualified leads, a clear attribution model to tie marketing spend to revenue, and a systematized demand generation program

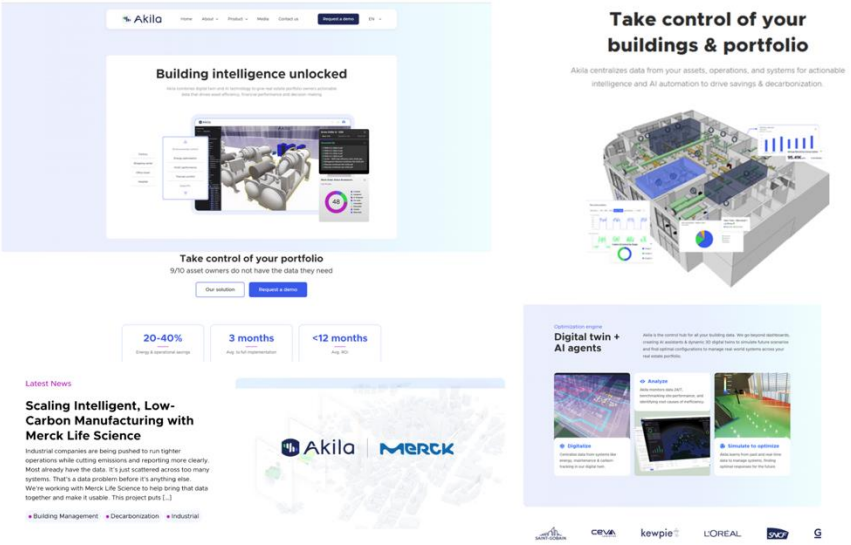
VISUAL IDENTITY UPGRADE

- A more market-ready identity helped the business look more credible across web, sales, and partner channels.

ORIGINAL VISUAL IDENTITY



AFTER BRAND UPDATE



KEY DELIVERABLES

- Website redesign
- PPT and flyer templates
- Brand book

RESULTS

- This case study demonstrates the ability to build a go-to-market capability around a complex technical product, align product and sales around a stronger commercial story, and scale that system across regions and partner ecosystems.
